Word of the week

Anenome - a small sea animal with many tentacles. There is an anenome in our story and we have had lots of fun saying this word!

What have we been up to this week?

The weather has been beautiful this week and our strawberries have started to grow in our growing area. We were so happy to eat these at snack time.

Our new story is 'sharing a shell' which is a lovely story about three friends learning to share. Their shell has a wonderful spiral pattern. We have been practicing how to make this spiral shape at our writing table and in the playdough area. We have also practiced this shape outside using the chalk.

Maths challenge

Can you count out 10 objects from a larger group? Get 10 items from a larger group e.g. 10 grapes from a bunch or 10 pencils from a pencil case.
